

# Price List Glossary

## Desktop Licensing Products

### Columns & their definitions:

**Adobe Part Number:** Product number assigned by Adobe

**Product:** The name of the Adobe Product for sale

**Version:** Version of the product

**Lang.:** Language

**Platform:** The operating system in which the software is intended to work on

**Config.:** Specific configuration or description of the type of item for sale, such as Upgrade, Renewal, Doc Set

**Config. Detail:** Additional information about the configuration or type of product. For example a Renewal SKU might have a 1Y or 2Y to specify the length of the time for the renewal

**Metric:** Unit of measure for something; users, decodes, per doc etc.

**Additional Detail:** Information varies, refer to specific definitions. Sometimes utilized for the additional configuration detail, or additional metrics about the specific details of each part number

**Level Detail:** Describes the licensing program level to which each SKU is a part. A product has a separate part number for each licensing level. It is important to use the appropriate SKU for the customer's licensing level.

**ESP: Estimated Street Price.** This is the estimated price for the specific region, market sector, program and product. Adobe does not set nor guarantee end user prices, however sets street prices for all price lists.

Please note that this is NOT the full list

**Price:** The price column states the price for each part number for the resale partner.

**Point Value:** Number of points achieved through a volume licensing program when this item is purchased

**Start Date:** start date of item (promotion start date or first day to order a new product for example)

**End Date:** End date of item (promotion start date or first day to order an old product for example))
